in the past 12 months

Experiences of sexual assault in the past 12 months:

Female\*\*

Male\*\*

. . .

Differently-described gender\*\*

Relative standard errors (RSE) were calculated for survey estimates. If the RSE was above 50% or there were no respondents to an item an \*\* appears meaning the estimate is unreliable and not reportable. Differently described gender includes students whose gender identity was not classified as female or male. Gender identity was derived using the 'two-step method' of cross-classifying responses to sex assigned at birth and current gender. Context of most impactful incident. Students who had been sexually harassed in a university context were asked questions about the context of the most impactful (or significant) incident they had experienced. This incident was self-identified by the student.
